WORK EXPERIENCE

Web Developer (React)

Freelance / Personal Projects / 2024 - Present

- Developed and deployed web applications using React, focusing on responsive design and performance.
- Built and maintained a personal portfolio to showcase web development projects.
- Portfolio: <https://chitgo.github.io/port-chit-1/>

Highlighted Projects:

• Blog Website:

A web application that allows users to read, create, edit, and delete blog posts. Users can register for an account to create posts or log in if they are existing users. It also features a toggle for switching between dark and light modes.

Technologies: React.js, TailwindCSS, Firebase

• Recipe Finder:

A user-friendly web app that helps users discover and explore food recipes. Features include search functionality, recipe browsing, and dynamic data integration.

Technologies: React.js, TailwindCSS, Redux, Edamam API

• Simple E-commerce Shop:

A basic e-commerce platform where users can browse and purchase items, filter products by various criteria, and view product details.

Technologies: React.js, TailwindCSS
